SUMMARY

Software Engineering graduate with hands-on experience building frontend and full-stack web applications using React, Next.js, Tailwind CSS, Node.js, PHP, and Laravel. Familiar with backend development, REST APIs, databases, and UI/UX design through academic and personal projects. Seeking a Software Engineering role where I can contribute to real-world products, strengthen my technical skills, and grow under experienced developers.

EDUCATION

Limkokwing University of Creative Technology, Cambodia

Nov 2022 - Dec 2025

- Bachelor of Software Engineering
-

PROJECTS

FitLink – Social Fitness Application

Group project

- Collaborated in a team to design and develop a social fitness application focused on workout tracking and community interaction
- Contributed to UI design and interactive prototypes using Figma
- Performed QA testing to identify bugs and usability issues
- Used GitHub for version control and team collaboration

DealFlow – AI Email Assistant

Solo Project

- Designed a full interactive UI in Figma, including user flows, wireframes, and high-fidelity screens
 - Built a web application that assists users with drafting email replies
 - Implemented features such as smart reply generation, basic conversation memory, and follow-up reminders
 - Integrated Stripe for subscription-based payments
-

TECHNICAL SKILLS

Languages: Java, C++, JavaScript, PHP

Database: PostgreSQL, MySQL

Frontend: React, HTML, CSS, Tailwind CSS, NextJs

Tools: Git, GitHub, Postman, VS Code

Backend: Node.js, Express, Laravel

Design: Figma

CAREER OBJECTIVE

To start my career as a software engineer where I can strengthen my frontend skills, learn from experienced engineers, and contribute to real-world products while growing into a professional software engineer.
